OFFICIAL INTERNAL OPERATIONS MANUAL

PRODUCT ASSORTMENT & PORTFOLIO MANAGEMENT

CURATION OPERATIONS MANUAL

Complete End-to-End Visual Standard Operating Procedure (SOP) for Admin Curation Management, Display Program & AP Set Builder, Strategic Role Assignment, Assortment Balance Review, and Growth Simulator Integration.

DOCUMENT ID
KSN-SOP-CUR-2026-V1

TARGET AUDIENCE
Curators, Staff & Admin

EFFECTIVE DATE
August 15, 2026

VERIFICATION

SYSTEM VERIFICATION NOTES (FINAL CROSS-CHECK)

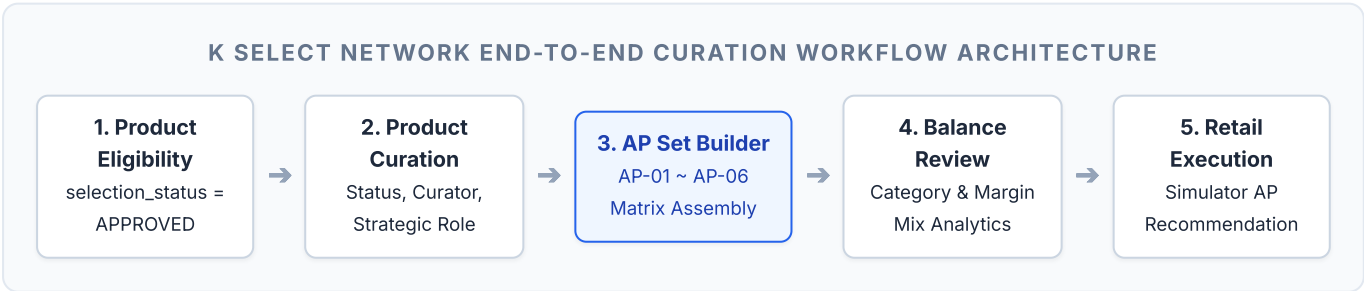

The following 5 technical findings reflect the exact live state of the Production database schema (Migration 0039_product_curation_system.sql), Server Actions (lib/product/admin-actions.ts), Engine (lib/simulator/engine.ts), and Admin UI components.

Item	Production Verification Status	SOP & Operational Guideline
1-1. Curation Selling	No separate standalone "Curation Selling" table or menu exists.	Curation is the <i>Planning & Portfolio Strategy Tool</i> (Back-office). Selling Curation occurs when curations are served via Growth Simulator AP Recommendations to Retailers during order placement.
1-2. Strategic Role	Canonical Role is TRAFFIC (Not STRAP). DB Enum & Server Actions match 100%.	The official 7 Strategic Roles are HERO, CORE, TRAFFIC, TREND, MARGIN, TRIAL, and SUPPORT.
1-3. Simulator Assortment	Data matching & Real-time AP calculation fully active in Engine.	Simulator recommends the optimal AP (AP-01 ~ AP-06) and SKU list. Order creation executes through standard staff estimate/order workflows.
1-4. Sales Status Warning	Live tracking active via Sales Status Mix Chart & Row Badges.	When a product is marked DISCONTINUED or HOLD, it triggers a visual warning badge in AP Detail. Curator manually performs Replace Product.
1-5. System Roles	Role check via verifyAdminSession() & RLS.	Official permission levels used in this SOP are Admin (Master Settings & Status Approval) and Staff (Curators & Ops Staff).

CH 1

CURATION OVERVIEW & SYSTEM ARCHITECTURE

K SELECT NETWORK Curation is the core operational framework that curates, ranks, and structures K-Beauty products into optimized retail display sets for US retail partners. Rather than selling individual standalone SKUs, products are organized into strategic **Assortment Profiles (APs)** tailored for specific retail floor spaces (4FT, 8FT, and 12FT Display Programs).

CH 2

CORE CONCEPTS & RELATIONAL MAPPING

Strategic Role (Product-Level)

Assigned individually to each product to define its global value proposition in the K-Beauty catalog.

- **HERO:** Signature hero item (Highest brand awareness)
- **CORE:** Bestseller generating baseline revenue
- **TRAFFIC:** High-engagement item drawing customer traffic
- **TREND:** Viral SNS & seasonal trend product
- **MARGIN:** High-profit margin builder
- **TRIAL:** Entry-level mini & trial kit SKU
- **SUPPORT:** Complementary routine completion item

AP Priority Role (AP Set-Level)

Defines the mandatory inclusion level of a product within a specific Assortment Profile matrix.

- **REQUIRED:** Mandatory SKU; cannot be omitted from AP
- **CORE:** Primary essential display item
- **OPTIONAL:** Flexible optional SKU based on retail size
- **TEST:** Incubating/test product for trial displays
- **EXCLUDE:** Explicitly excluded from this specific AP

CURATION CONTROL CENTER OPERATION GUIDE

Path: Products → Curation (URL: /admin/products/curation)

The Curation Control Center is the main executive dashboard for monitoring the 3 Display Programs and 18 Assortment Profiles. It provides real-time counts of Active SKUs, Brands, and margin metrics.

ADMIN PORTAL → PRODUCTS → CURATION CONTROL CENTER

AP SET BUILDER & ANALYTICS OPERATION GUIDE

Path: Products → Curation → [Program] → [AP Code]

ANALYTICS MIX

The AP Detail Builder automatically computes Category Mix, Brand Mix, Priority Role Mix, and Price Range Mix. Curators must inspect these charts before saving to prevent category over-concentration.

AP SET BUILDER → START_4FT / AP-01 (Standard Assortment 01)

TARGET: 10 SKU | SELECTED: 10 SKU

Assortment Items (10 Selected)

1 + Add Product

Product Name & SKU	Brand	Category	AP Priority Role	Status	Actions
Snail Repair Intensive Ampoule SKU: KSN-SN-001	K-Beauty Brand A	Skincare → Ampoule	2 REQUIRED ▼	ACTIVE	3 Replace Remove

ITEM MANAGEMENT

1. Click **+ Add Product** (**1**) to search & insert candidate SKUs.
2. Adjust **AP Priority Role Dropdown** (**2**) to REQUIRED, CORE, OPTIONAL, or TEST.
3. Click **Replace** (**3**) to swap a product 1:1 while maintaining its Priority Role.

DISCONTINUED AUDIT

If a product status turns **DISCONTINUED**, a red warning badge will appear in the table. Curators must immediately click **Replace** to substitute it with an active SKU.

CH 5

INDIVIDUAL PRODUCT CURATION OVERRIDE

Path: Products → [Product ID] → Curation Override Tab

This tab allows staff to manage curation parameters from a single product's perspective, overriding global settings and assigning its matrix status across all 18 APs.

CURATION MASTER SETTINGS (ADMIN ONLY)

Path: Settings → Curation (URL: /admin/settings/curation)

ADMIN ONLY

Modifying Display Programs or Assortment Profile target SKUs directly impacts retail recommendation algorithms. Only Master Admin users are permitted to edit these values.

1. Display Program Master Settings

Manage code (START_4FT, GROW_8FT, EXPAND_12FT), program names, Descriptions, min/max SKU boundaries, and active status toggle.
2. AP & Matching Tag Settings

Manage AP target SKUs (10, 25, 45), link marketing tags (e.g. #Hydration, #GlassSkin), and re-order tag display priority using drag-and-drop or order inputs.

CH 7

TROUBLESHOOTING & FAQ

Symptom / Issue	Root Cause	Resolution Step
Product does not appear in candidate add list	Product selection_status is not APPROVED or product is already added.	Check product master status under Products directory and confirm approval.
Target SKU count badge shows orange mismatch	Selected SKU count is less than or exceeds target SKU for that AP.	Add or remove SKUs in AP Set Builder until count matches exact Target SKU.
Discontinued product remains in AP Set	Product status was changed to DISCONTINUED after set assembly.	Click Replace on the row to swap it 1:1 with an active SKU.

Symptom / Issue	Root Cause	Resolution Step
Role change is not updating Analytics charts	Browser cache or pending server revalidation.	Refresh page or verify network response in AP Set Builder.

CH 8

CURATION COMPREHENSIVE GLOSSARY

- Curation:** The strategic process of selecting, categorizing, and ranking products into retail assortment sets.

Display Program: Retail floor display tier (START 4FT, GROW 8FT, EXPAND 12FT).

Assortment Profile (AP): Pre-curated SKU combination (AP-01 ~ AP-06 per program).

Target SKU: The prescribed exact number of SKUs required for a given AP profile.
- HERO:** Signature flagship SKU with highest brand awareness.

CORE: High-volume baseline revenue generator SKU.

TRAFFIC: High-engagement SKU designed to draw store foot traffic.

REQUIRED: Mandatory inclusion priority level within an AP matrix.

CH
9

UX & OPERATIONS IMPROVEMENT
RECOMMENDATIONS

Problem Area	Impact	Recommendation	Priority
Target SKU Mismatch Visibility	Curators may inadvertently leave AP sets under-filled or over-filled.	Add prominent top-bar warning banner when Selected SKU !== Target SKU.	HIGH
Discontinued SKU Auto-Alert	Discontinued products can linger silently in active retail AP sets.	Implement automatic email notification to Curator when an AP SKU turns Discontinued.	MEDIUM
Bulk AP Matrix Assignment	Assigning 18 AP inclusion states one by one for a new product takes excessive clicks.	Add "Apply Template Batch" button to populate all 18 AP states at once.	LOW
