CURATION QUICK REFERENCE GUIDE (1-PAGE SOP CHEAT SHEET)

QUICK CHEAT SHEET · V1.0

SOP 1: Candidate Review & Curator Assign

Product Level

1. Go to Products → [Product ID] → Curation Tab .

2. Confirm selection_status === APPROVED .

3. Select Curator Name from Lead Curator dropdown.

4. Change Status from NOT_REVIEWED → APPROVED .

5. Set Next Review Date & Click Save Curation Profile.

SOP 2: Setting Product Strategic Role

Role Strategy

• HERO: Signature flagship SKU (Top brand awareness).

• CORE: Bestseller generating baseline revenue.

• TRAFFIC: High-engagement SKU driving foot traffic.

• TREND: Viral SNS & seasonal trend SKU.

• MARGIN: High-margin profit generator.

• TRIAL / SUPPORT: Entry kit & routine support SKU.

SOP 3: Adding Product to AP Set

AP Set Builder

1. Go to Products → Curation → [Program] → [AP Code] .

2. Click + Add Product button at top right.

3. Search candidate SKU by Name, Brand or Letusto SKU.

4. Select AP Priority Role (REQUIRED / CORE / OPTIONAL).

5. Click Add to AP Set & confirm table update.

SOP 4: Replacing Product in AP Set

1:1 Product Swap

1. In AP Detail table, locate row to replace.

2. Click Replace button in Actions column.

3. Search replacement SKU from candidate popup.

4. Click Confirm Replacement.

5. New SKU inherits previous SKU's Priority Role.

SOP 5: Auditing Target SKU Match

Assortment Audit

• START_4FT: Target = 10 SKUs

• GROW_8FT: Target = 25 SKUs

• EXPAND_12FT: Target = 45 SKUs

• Ensure Selected SKU === Target SKU (Green badge).

• If mismatch (Orange), add/remove SKUs immediately.

SOP 6: Discontinued Product Audit

Safety Audit

1. Check table for red DISCONTINUED badges.

2. Click Replace button on the row.

3. Select active substitute SKU in same category.

4. Verify Category & Brand Mix charts update clean.

QUICK TROUBLESHOOTING CHEAT SHEET

Issue	Quick Diagnostic	Immediate Action
Candidate SKU missing in Add Modal	selection_status !== APPROVED	Approve product selection under Products master directory first.
AP Selected SKU count mismatch	Count under or over Target SKU	Add or remove SKUs in AP Detail until Selected === Target SKU.
Matching Tag search yields no results	Tag does not exist in master table	Create tag under Settings → Curation → Tag Manager first.
Simulator recommendation differs	AP matrix priority changed recently	Re-run simulator sandbox calculation to verify updated AP set.
